WALL STREET.

There was not little excitement in Wall street to-day. The money market was easy, especially towards six o'clock, and there were no heavy transactions. The principal interest was in the gold room, owing to a rumor in the morning that a proclamation had been issued to-day thirty days additional and advance the rates. The Times credits the rumor and advises Secretary Boutwell to act promptly and boldly and to say nothing more to us. The government will not say anything in gold sales, and France has a right to buy gold upon the same terms as others. The stock market was weak, the heaviest decline being in Erie. Pacific Mail closed 7½; Western Union, 1; Quicksilver pref'd more than eight points.

is expected here to-morrow, and it is reported that he comes to confer with General Butterfield concerning the sales of gold and other financial matters.
